Achieve unobstructed front to back airflow and total access to the rear of rack mounted equipment with DAMAC's Axis Server Rack. This unique DAMAC server rack offers multiple options for integration into the cabinet frame depending on the cabinet size you are looking for. These options include universal PDU button mounting, flexible fiber, and copper management rings and straps.

Features :

- Fully welded tubular steel construction
- Floor Mounting Channel
- Recessed rear cabling and PDU mounting cavity (coffin section) (dependent on size)
- Provisions for doors, side panels and tops
- Open bottom for raised floor access and ventilation
- Fully welded seismic floor mounting channel
- Floor levelling and mounting provision, accessible when fully populated
- Grounding stud
- Light weight caster kit included
- Coupling kit provisions included
- Textured epoxy powder-coat finish
